

AAC interview and device trial record

Original context and trial notes; not comprehensive assessment or device selection. therapycrm.io

1. Communication priorities and trial question

Communicator priorities / preferences and information source

Current modes / languages / partners / settings

Routine / communication function and team-selected trial question

Option / version reference; access arrangement and barriers

Opportunity / observation window / outcome and support codes

Missing / declined / interrupted rule; untried contexts

Describe access assistance separately from prompting the message. Do not rank communication modes or copy publisher assessment grids.

2. Trial observations and team review

Trial log

Context / option	Message / mode / outcome	Access / response support	Count / time / limits

Named outcome counts / eligible denominator / excluded states

Communicator and partner feedback; source / date

Remaining question / team member / next context / review date

Approved source record / author / sharing scope

One trial does not establish AAC eligibility or device suitability. Funding reports and professional assessment requirements are separate.
