

Observer agreement and fidelity records

Independent paired observations and approved-procedure implementation are separate questions. therapycrm.io

IOA method / unit / definition

Observer references / synchronized window / pairing rule

Preserve both independent source records

Pair	Window / unit	A value	B value	Status / excluded-pair reason

Valid pairs / planned pairs / eligible denominator

Formula / result / zero-denominator handling

Disagreement patterns / reviewer decision

Fidelity: use the approved procedure's observable items

Approved procedure reference / version / observer

Applicable opportunity and scoring rules

Original blank implementation record

Expected action	Opportunity	Result	Observed context / support

Keep completed, not completed, not applicable and not observed distinct. A percentage does not validate the procedure or replace review of safety-critical items.

Completed items / valid applicable observed items

Not applicable / not observed / review and follow-up
