

Preference and outcome record pack

Document accessible offers and choices; preference alone does not establish reinforcement. therapycrm.io

Question / routine / client-nominated candidate set

Authorized format reference, if any / selection and stop signals

Access, familiarity and relevant constraints

All offered opportunities, including declines and missing records

Reference	Options / access	Observed choice	Status / position / context

Selections / each option's valid exposures / exclusions

Separate responding and outcome record

Existing approved plan / outcome definition / unit

Actual access and support arrangement / observation rule

Descriptive source observations

Window	Observed time / opportunities	Response / support	Context / source / outcome

No assessment protocol, deprivation arrangement or reinforcement schedule is supplied. Preserve access to basic needs and communication. Descriptive counts alone do not establish causality.

Comparability / missing coverage / interpretation limits

Clinician review question / decision
